Evenrude engine problems resolved?

Rod Bowers is the Chief UK Engineer for Johnson Evenrude engines and was our last hope of solving the problem with our Johnson 40HP engine before we went 'legal' with the importer. Rod was most helpful and spent the whole day tackling the problem. The Club provided the necessary facilities to help Rod with his task. Adrian Williams and his family, along with Gus and Mike Knowles were present to facilitate trials in the Conwy estuary. Hopefully, now Rod has identified and resolved our engine problem- fingers crossed!

Optimist National Championships – Largs

The regatta was mainly light winds with three of the scheduled days racing lost. Low mist also created problems for the race management. Tuesday proved the exception, when there was a force 5 gusting 6, resulting in a late start and 2 races on that day. Over the regatta there were 8 races with one discard. Usually in the Nationals there are 12 races with 2 discards.

I came 24th in the senior fleet overall - 2nd Welsh.

New RIB

The Club has now purchased a new RIB / engine and launching trolley (total cost £2896). The rig is light enough to be launched by hand if necessary, and will be used for training, as a Committee boat for sea starts and a rescue boat when dumping waves make the recovery of the Humber difficult.
